To whom it may concern

Ardmac engaged the services of MDCE on a high profile Hospital Project in Dublin in 2009, for the Groundworks & Structural Steelwork Subcontract Package.

We were very pleased with the services provided by MDCE, which assisted Ardmac as Main Contractor in handing over a successful project to our client.

MDCE conducted a thorough site survey prior to submitting a very competitive quotation which then led to a successful appointment. MDCE site supervision liaised with Ardmac site supervision on a regular basis & kept Ardmac informed of progress as the job progressed and any problems on site were addressed quickly & efficiently with minimal cost where possible.

The Groudworks Package was always restricted to a very tight programme & MDCE signed up to this programme & delivered on time. MDCE also adhered to Ardmac's company Health & Safety Policy at all times.

On the basis of the work carried out on this project we would recommend MDCE to others and would certainly consider using the services of MDCE on similar projects in the future.

Yours faithfully,  
For ARDMAC LTD
