TO WHOM IT MAY CONCERN

I am happy to recommend **Michael Doyle Civil Engineering Ltd** as a professional and competent civil engineering contractor based on our experience employing them on a modestly sized but relatively complex basement works contract.

The works included laying a new screed to exacting level tolerances within a low headroom space as well as extensive saw-cutting of an existing reinforced concrete slab and the installation of new surface water drainage runs. The overall workmanship was to a high standard and the contract was completed in a timely fashion within the client's budget.
