Re: Letter of recommendation

To whom it might concern,

Dear sir,

Micheal Doyle Civil Engineering (MDCE) constructed more than 5 km of site roads, 9 crane pads, 9 foundations pits, 4km of 20 kV ducting works and a 20kV substation for Ballycadden Wind Farm, within the agreed time frame and requested quality standards.

In addition, the project was able to make significant cost savings due to close cooperation between the engineers of MDCE, the design team and the client. The result is a project of good value and good quality.

We appreciated the cooperation with MDCE, their work ethic, attitude, experience and adherence to our instructions. They also delivered on their promises.

We have to conclude that even after the serious weather conditions during the project, and the heavy traffic (loads and frequency), the project was completed above our expectations and we are very happy to recommend MDCE to anyone who is looking for a civil contractor.

Yours sincerely,

Peter Goderis
