**To Whom It May Concern**

Dear Sir / Madam,

**MDCE Works in association with KN Network Services (IRE) Limited.**

Michael Doyle Civil Engineering Limited have worked directly with KN Network Services (IRE) Limited on a number of projects for BT Ireland for the National Broadband Scheme rollout project, and have successfully completed same with exacting standards to our satisfaction, as well as our ultimate Clients. From their involvement on the project, they have prided themselves on delivering top quality products, some of which have been within extremely tight deadlines and in severe weather conditions.

Their attention to detail on issues such as health and safety, and adherence to the required standards has been beyond reproach. Any issues arising within within the build programme have been dealt with in a prompt and professional manner to the benefit of all parties involved. The personnel involved in our projects have been proactive in the delivery to ensure that our reputation remains unscathed. They have taken additional volumes of works when necessary to meet the overall build programme, and delivered same in their stride.

We also appreciate the hands-on approach adopted by Michael Doyle directly throughout all projects on which his company is involved. Michael is a competent and approachable individual, with a wealth of experience in the civil engineering sector.

We look forward to carrying on our positive working relationship with Michael Doyle Civil Engineering Limited well into the future, and we would have no hesitation in recommending them as suitable civil engineering subcontractors.

Yours faithfully,

Gary Devenney  
**Commercial Manager**  
**KN Network Services**
